

Short Term Lean Training and Factory Diagnostic Visit

Lean Training and Diagnostic Visit
Targeted Lean Support

Targeted Short Term Focused Support Programs

All factories are facing staggering cost increases and shortages of trained professional labour. AMC, a leader in lean training and kaizen, offers quick, easy, and low cost ways for factories to obtain professional lean manufacturing guidance, focused on your factory's specific issues and meeting your timetable.

Our short-term programs have all been designed to fit the situations we find among our customers in China, Vietnam, and Indonesia. These programs include **Factory Diagnostic Visits** and **Short Term Problem-Specific Targeted Support Visits**.

2 Day Program: Lean Factory Diagnostic Visit

- Duration: 2 days
- Location: Both days at your factory.
- Intended for: Factories which have begun to implement lean and need a quick support and diagnostic visit.
- Attended by: Senior Managers, Middle Managers, Industrial Engineers
- Content: Focused 2 days at your factory results in a Lean Assessment, provided in a written format, which can be used to guide your next steps and on-going improvement programs. Includes factory "Waste-Walk", creation-of-flow discussion, cell-design assessment, and line-balancing strategies.

3 Day Program: Combination Seminar Training and Factory Lean Diagnostic Visit

- Duration: 3 days
- Location: Day 1: at a Public Seminar. Attended by a group of factories in your city.
Day 2 and 3: At each individual factory, separately.
- Intended for: All factories which want to learn about what lean can do their operation and want an in-person visit by a Senior AMC lean professional to provide on-site guidance and support and diagnostic visit to their factory.
- Attended by: Owners and Senior Managers and Middle Managers
- Content: Provides a 1 day overview in a public seminar format of what you can expect if you implement a lean program. Covers concepts, basic training and implementation strategies. The 2nd and 3rd days follow AMC's **2 Day Program: Lean Factory Diagnostic Visit**. Both of these 2 days are at your specific factory location, attended by only your own factory's personnel. These 2 days are scheduled at your convenience at any time that is convenient for you and your staff. The 2 days at your factory results in a Lean Assessment, provided in a written format, which can be used to guide your next steps.

5 Day Program: 5 Day Short Term Lean Specific, Targeted Support Visit

- Duration: 5 days
- Location: All 5 days at your factory
- Intended for: Factories which have some short term support requirement such as re-training of their Industrial Engineers or Line Supervisors for specific issues such as Line Balancing or Cell Design, or Kaizen Training, or TPM, or SMED or 5S+Safety
- Attended by: Middle Managers, Lean Champions, Industrial Engineers, Line Supervisors
- Content: 5 solid days of world-class training for specific areas of support.

All of AMC's short term lean training and factory diagnostic visits are designed with cost and speed in mind. Specific, targeted support for your specific, unique situation.
